

Water Pressure Sensor

The Water Pressure Sensor is high stable and reliable pressure sensor and used for measure and control of water flow pressure in irrigation and water supply systems.

The Water Pressure Sensor can be connected directly to any controller in Mottech's system via Analog input or Mottech Smart Card.

Features and Benefits

**High accuracy,
high sensitivity**

Fast response

Good stability

**Strong resistance to
interference**

**Anti-corrosion
material optional**

**Wide measurement
range**

Applications

Irrigation

Water supply

Water source monitoring

Urban water drainage

Aquaculture

Environmental protection
